

# What is the Visioning Workshop?

- The visioning workshop is the kickoff of the town forest planning process in our community.
- This workshop is all about understanding YOUR vision for our town forest.
- At this point in the process we want to encourage you to think expansively about our town forest and your vision for forest-based recreation in our community.
- This is a time to express all your wants and desires and to get everything on the table.
- Try not to be bogged down in constraints on the site or current realities that might restrict what you think is possible in our town forest—we will grapple with what is possible on the site and the best ways to achieve our vision in the next phase of the project.

## HOW TO PROVIDE INPUT:

- Stations include dot exercises, write in boards, and floor maps to draw your ideas on.
- Steering committee members are milling about the stations and available for one-on-one conversations.
- An open comment box is also available at the sign in station.

*Envision what it would be like to leave town and come back 20 years later. What would our town forest look like in that dream-like future state?*
