

Vermont Big Tree Program

Vacant Species List

The Vermont Big Tree Program tracks approximately 145 species and we are looking for help to fill the vacant tree species listed below.

We use the American Forests' formula to determine whether a tree is a champion. Three measurements are used: **circumference, height, and crown spread**. Follow our [measuring guidelines](#) on our website and nominate a big tree today!

Ash, Black	Hawthorn, Washington	Pawpaw, Common
Ash, Green	Hickory, Pignut	Pear, Common
