### 2019 Inventory Summary

Tree Diameter (inches, DBH)	Ash Tree Ownership			
	Town ROW	Utility (GMP, WEC, Comcast)	Private Landowner	Totals
6-11	1686	117	24	1827
12-23	679	88	20	787
24+	72	7	3	82
<b>Grand Total</b>	<b>2,437</b>	<b>212</b>	<b>47</b>	<b>2,696</b>

Note: The projects have included utility and private trees, as well as some non-ash hazard trees. Almost 1,370-298 = 1,072 ash trees 6 in. DBH and larger have been removed (about 40% of the trees inventoried in 2019). Based on the table below showing the roads completed, we are removing about 1,027/1,782 = 58% of the 6 in.+ ash trees on the roads we do, and we are about 66% (1,782/2,696) finished overall, assuming every road is to be done. The 42% trees left standing may seem high, but it reflects general avoidance of utility trees, as well as trees left because they are judged not to present a hazard.
