

# Wood Products Scavenger Hunt

Once upon a time, it was easy to see parts of a tree such as the wood in our houses. Early settlers built their houses out of wood, used wood pegs to hold the house together, and lived in a wooden world (buckets, dishes, fences, and many other products). Today, nearly 2,000 products come from trees, not just wood.

See how many wood products are in your home—go on a scavenger hunt with friends, family or by yourself. Look around your house and fill in these rows with the items you find. See how many items you can find for each row. If you wonder which row an item goes in, check out the forest products list on this website: [www.vtfpr.org/coned/pubs.cfm](http://www.vtfpr.org/coned/pubs.cfm).
